

Position: Assistant General Counsel

Position Location: Carmel, IN, Washington, D.C.; Eagan, MN; Little Rock, AR; or Metairie, LA

ID: LEG201609-1805

## **MISO OVERVIEW**

MISO is an essential link in the safe, cost-effective delivery of electric power across all or parts of 15 U.S. states and the Canadian province of Manitoba. As a Regional Transmission Organization, MISO assures consumers of unbiased regional grid management and open access to the transmission facilities under MISO's functional supervision.

We manage one of the world's largest energy markets, clearing billions in gross market charges annually. We use a five-minute commitment process that provides market liquidity and transparent pricing while also minimizing congestion and maximizing efficient energy transmission.

MISO has a comprehensive benefits plan and offers relocation assistance.

## **POSITION OVERVIEW**

This is not a traditional in-house lawyer role. If selected for the role, how you work will be as important as what you do. We are seeking senior FERC legal business partners from broad and diverse backgrounds who are true corporate citizens. Our ideal candidate will be "all in" at work; thrive on collaboratively creating options and strategic value-added solutions; and serve as a reliable steward of the entire company who takes a "company-first and self-last" approach. Our ideal candidate will also be a humble team player; who is hungry and highly motivated to deliver strong results; while also demonstrating exceptional customer service and people smarts. If this is you, then read on.

Please apply only if you have extensive experience providing strategic legal and business advice regarding electric transmission issues impacting Regional Transmission Organizations, their members, and stakeholders, as well as considerable hands on Federal Energy Regulatory Commission expertise. Our ideal candidate will have a successful history of directly handling varied and complex FERC matters, teaching less senior lawyers about FERC practice, and excellent relationships with key players in the electric transmission industry. This person will lead and partner with others to lead efforts on a wide variety of legal and business matters focused mainly on: FERC regulatory proceedings, risk identification, and mitigation strategies, all in order to contribute to and influence the strategic direction of the company.

## **QUALIFICATIONS**

- Strong FERC and ISO/RTO experience, required
- Juris Doctor (J.D.) degree, required
- License to practice law in any US state or the District of Columbia, required
- Indiana licensure required or able to obtain within 18 months from date of hire, with an Indiana Bar application filed before the first day of employment, required
- At least fifteen years practice in a corporate environment, federal government, or law firm with utility regulation, litigation, administrative and energy law practice, required
